

SST Talking Points

- We are approaching this system change with a lens on high levels of learning for all students, and are changing the name of the meetings from RTI meetings to Student Success Team (SST) meetings
- Referral and scheduling of students to SST will be based on need rather than grade level
- The revised process reflects the in-depth study and practice of RTI at Work and PLCs, both from Solution Tree
- Tier II will focus on re-teaching of essential standards (agreed upon district-wide)
- The revised process brings PLC work and interventions together
- The Revised process is more focused on the individual needs of students—social, emotional, physical, cognitive
- The revised process is inclusive of all staff as problem-solvers. We work together to identify potential interventions.
- Our universal screeners, DIBELS literacy and Easy CBM math, will continue to identify students who need support with universal skills in math and reading.
- Students who are a year or more behind in math and reading (DIBELS and EZ CBM data) will be supported with tier III remediation from specialists.

The new flowchart/handbook are guiding documents.

We know that one size does not fit all. 😊
