Explanation of the Overall and Scale Percentages:

The scores are based on a "percent of max" score. A percent of max score indicates the percentage of points the parent "awarded" to the program on certain items.

For example, a parent who rated the program a "4" (Strongly Agree) on each of the selected items, would receive a 100% score. This parent awarded the program the highest number of possible points. A parent who rated the program a "1" (Strongly Disagree) on each of the selected items would receive a 0% score. This parent rated the program the lowest number of points possible. A parent who rated the program a "3" (Agree) on each of the selected items would receive a 67% score. This parent awarded the program 67% of the total possible points. A parent who rated the program a "2" (Disagree) on each of the selected items would receive a 33% score.

Please note that there is more than one way of arriving at a particular score. For example, to get a 67% score, a parent might have circled response "3" (Agree) on each of the selected items. Or a parent could have rated the program a "4" (Strongly Agree) on half the items and a "2" (Disagree) on half the items – this also would result in a 67% score.

To determine the state's Overall Parent Involvement Score, the percentage of parents who had a percent of max score of 67% or above AND who did not have any "Strongly Disagree" ratings was calculated. This is based on all 9 items.

Interpretation example of a scale score: If the mean score for Parent Input is 75%, that means that on average, parents awarded 75% of the total possible points to the two Parent Input items.

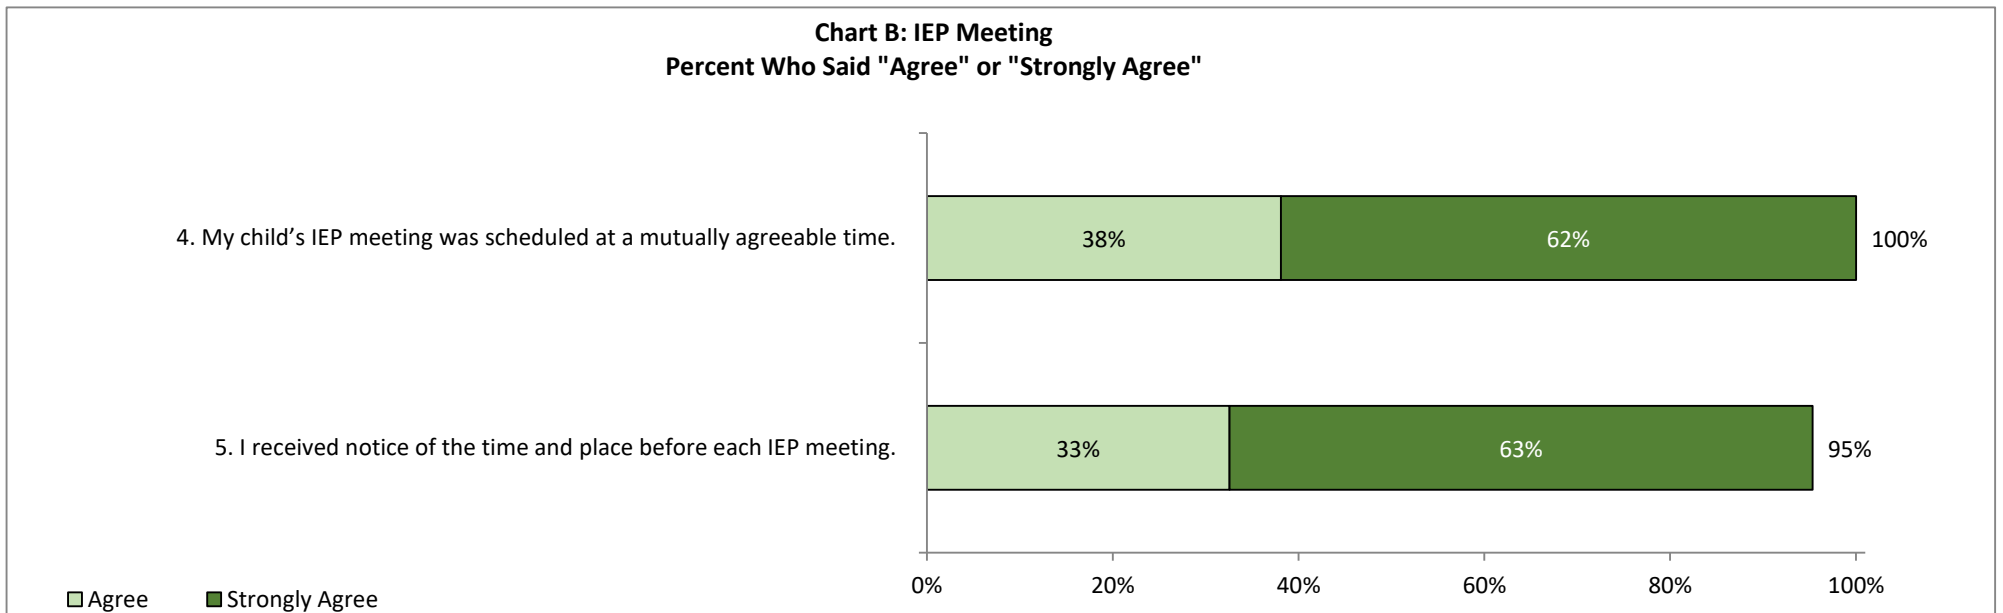

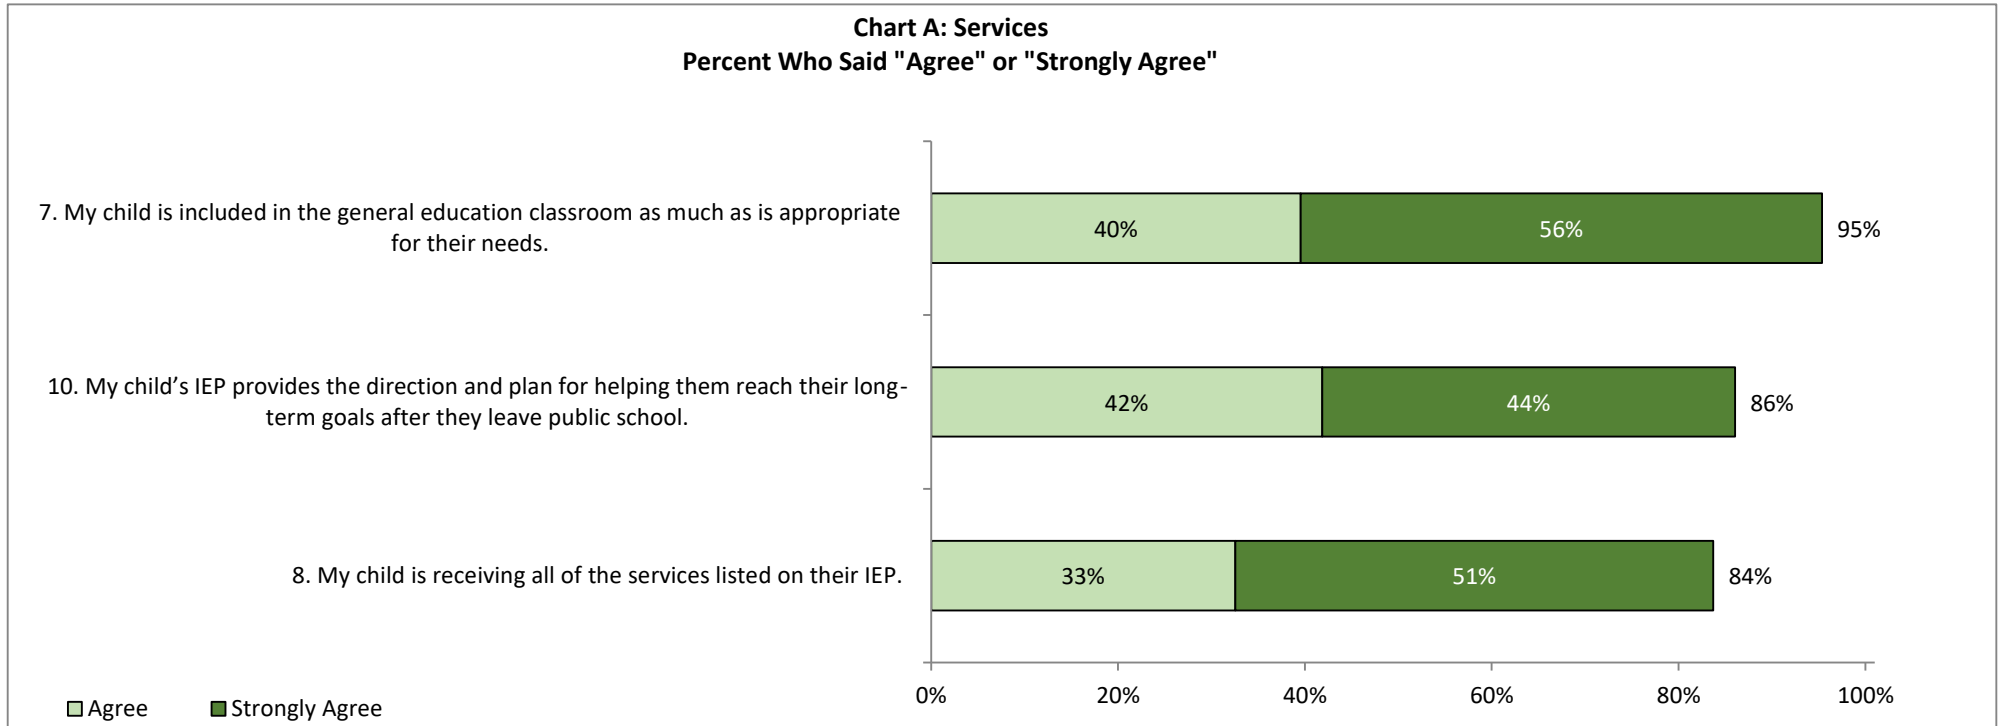

Scales for the mean scores: Parent Input (Q03, Q06); IEP Meeting (Q04, Q05); Communication (Q01, Q02, Q09); Services (Q07, Q08, Q10)
